SKILLS

- Microsoft Office Suite (Excel, Word, PowerPoint)
- Data Analysis
- SQL
- Python
- Java
- C++
- Web Development (HTML, CSS, JavaScript)
- Graphic Design (Adobe Photoshop, Canva)
- Mobile App Development

LANGUAGES

- English (Fluent)
- Urdu (Native)

PROFILE

Information Technology student with interests in web development, mobile app development, and video editing. Skilled in Python, Canva, graphic design, Microsoft Office, and problem-solving. Passionate about learning new technologies, building digital solutions, and applying creativity to technical projects. Eager to gain hands-on experience and grow professionally in the IT industry.

PROJECTS

• Mobile App Development

Grade Calculator App

- Technologies: Java, Android Studio, XML
- Built an Android calculator application capable of performing basic arithmetic operations.
- Designed an intuitive user interface and implemented button click events.
- Applied Android activity lifecycle and event-driven programming concepts.

Temperature Converter App

- Technologies: Java, Android Studio, XML
- Developed an Android application to convert temperatures between Celsius, Fahrenheit, and Kelvin.
- Designed a simple and user-friendly interface for entering values and displaying results.
- Implemented conversion formulas and input validation using Java.
- Applied Android UI design, event handling, and activity management concepts.

Kids Story book

- Technologies: Java, Android Studio, XML
- Developed an Android application that provides children with interactive and engaging storybooks.
- Designed a user-friendly interface with easy navigation between stories and chapters.
- Implemented features for reading, browsing, and selecting stories.
- Focused on creating an attractive and child-friendly user experience using Android UI components.

• Web Development

- Portfolio Website – Single-page responsive website using HTML & CSS
- Registration Form – Created form with validation using HTML, CSS, PHP

EDUCATION

Bachelor of Information Technology

University of Sindh, Jamshoro

2024 -Present
expected
graduation: 2027

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Web Development, Probability & Statistics etc.

CERTIFICATES

Foundations of Cybersecurity

Google via Coursera | May 2026

- Successfully completed an introductory cybersecurity course covering security principles, risk management, cyber threats, and security best practices
- link: <https://coursera.org/verify/VWKKPTH9V8KB>

Google AI Essentials

Google via Coursera | August 2025

- Learned the fundamentals of Artificial Intelligence (AI), generative AI, prompt engineering, and practical AI applications in productivity and problem-solving.
- link: <https://coursera.org/verify/F6J5Y8LHCR8B>
